

Christmas 2021

Dear Friends and Family,

This year was downright unbelievable. Sarah (21) enrolled in a cooking school but was expelled for turning every dish into a flaming dessert. Alex (15) built a go-kart powered by Mentos and Diet Coke. It reached 60 mph before crashing into the neighbor's garage.

John started training for a barefoot marathon but got stuck in mud halfway through. I accidentally invented a new energy drink when my coffee maker exploded. It's now being sold on Amazon and in five countries as "*Buzz Juice*."

Wishing you a Christmas filled with unexpected adventures!

Caffeinated and chaotic,
The Smith Family
